Chartis, a leading healthcare advisory firm, was named to Forbes' list of Americas Best Management Consulting Firms. This year marks the 10th anniversary of the list and the fourth time Chartis has been named.

"Chartis is proud to be recognized as one of Americas best management consulting firms by Forbes," said Chartis President Greg Maddrey. "We stand united in our commitment to help our clients address their most complex challenges related to healthcare access, equity, affordability, quality & safety, and the patient and caregiver experience. Chartis is passionate about helping reshape healthcare for the better."

Annual ratings are based on two surveys conducted by market research company Statista: a survey for partners and executives at management consulting firms and through surveys that are specifically designed for clients of these firms. Chartis' was highly rated in both.

Earlier this year, Chartis was the first firm to be ranked as the Best Overall Healthcare Management Consulting Firm and the Best Overall IT Services Firm in same year by KLAS Research. These two awards signal that Chartis achieved higher, more consistent client impact and satisfaction ratings than any other firm.

List methodology

The annual ratings are based on two surveys conducted from mid-November 2024 to mid-January 2025: a peer-to-peer survey of more than 1,200 partners and executives at management consulting firms; and a survey of more than 1,150 clients who had worked with management consulting firms in the past four years. Both groups evaluated consulting firms within their areas of knowledge in 33 possible categories consisting of 16 different industries (including IT, insurance, energy and environment) and 17 different functional areas (including artificial intelligence, finance and risk management, and supply chain management). The final list highlights 191 companies. List-makers pay no fee to participate or be selected
