

Peer Review

TURN PEER REVIEW INTO A POSITIVE FORCE FOR PRACTITIONER IMPROVEMENT

Peer review shouldn't be a compulsory burden, but rather a collaborative, collegial process presenting the opportunity to improve the quality of practitioner performance and ensure patient safety.

Practitioner peer review is an essential component of high-quality healthcare. But all too often, we see organizations that treat the peer review process as a regulatory exercise—one that practitioners consider extremely punitive—used to meet requirements rather than improve patient care.

Investing in peer review should yield a return on investment (ROI). Organizations that invest and engage with the process are more likely to see a positive ROI. The results are tangible:

- Improved patient safety and quality of care
- Heightened potential to meet metrics-driven outcomes and goals
- A positive shift in approach—from punitive to motivation for continuous improvement

We can help.

Developed by our diverse team of healthcare leaders, we help you turn peer review into a positive force for practitioner improvement.

Our services include:

- **Peer Review Redesign:** Using established policies and tools for implementation, our team helps you facilitate optimal medical staff decision-making and provides support along the way.
- **Peer Review Assessments:** We provide an independent, deep-dive assessment, along with specific recommendations for implementing identified improvement opportunities.

The Results You Can Expect to See

Improved clinical performance – practitioners receive actionable data to help them boost their performances

Enhanced pay for performance – we help you aim for exemplary metrics-driven outcomes, best practices, and patient satisfaction to mitigate financial risk and optimize revenue potential

Mitigated presence or perception of bias – process and policy methodologies that lessen the impact of personal, group, or specialty bias

A Proven Partner You Can Trust

We Bring:

- Expert-led facilitation
- Multifaceted healthcare leadership experience
- Nationwide leading practice experience
- Established tools and methodologies

Improve your clinical performance while making peer review positive.

When you redesign your peer review process, you'll increase practitioner satisfaction and discover a world of improved patient care and performance metrics.
